Victory in the Seven Years’ War made Britain the master of a vastly enlarged imperial domain in North America. But victory—including the subsequent need to garrison ten thousand troops along the sprawling American frontier—was painfully costly. The London government therefore struggled after 1763 to compel the American colonists to shoulder some of the financial costs of empire. This change in British colonial policy reinforced an emerging sense of American political identity and helped to precipitate the American Revolution.

The eventual conflict was by no means inevitable. Indeed, given the tightening commercial, military, and cultural bonds between colonies and mother country since the first crude settlements a century and a half earlier, it might be considered remarkable that the Revolution happened at all. The truth is that Americans were reluctant revolutionaries. Until late in the day, they sought only to claim the “rights of Englishmen,” not to separate from the mother country. But what began as a squabble about economic policies soon exposed irreconcilable differences between Americans and Britons over cherished political principles. The ensuing clash gave birth to a new nation.

The Deep Roots of Revolution

In a broad sense, America was a revolutionary force from the day of its discovery by Europeans. The New World nurtured new ideas about the nature of society, citizen, and government. In the Old World, many humble folk had long lived in the shadow of graveyards that contained the bones of their ancestors for a thousand years past. Few people born into such changeless surroundings dared to question their social status. But European immigrants in the New World were not so easily subdued by the scowl of their superiors. In the American wilderness, they encountered a world that was theirs to make afresh.

Two ideas in particular had taken root in the minds of the American colonists by the mid-eighteenth century: one was what historians call republicanism. Looking to the models of the ancient Greek and Roman republics, exponents of republicanism defined a just society as one in which all citizens willingly subordinated their private, selfish interests to the common good. Both the stability of society and the authority of government thus depended on the virtue of the citizenry—its capacity for selflessness, self-sufficiency, and courage, and especially its appetite for civic involvement. By its very nature, republicanism was opposed to hierarchical and authoritarian institutions such as aristocracy and monarchy.

A second idea that fundamentally shaped American political thought derived from a group of British political commentators known as radical Whigs. Widely read by the colonists, the Whigs feared the threat to liberty posed by the arbitrary power of the monarch and his ministers relative to elected representatives in Parliament. The Whigs mounted withering attacks on the use of patronage and bribes by the king’s ministers—symptoms of a wider moral failure in society that they called “corruption,” in the sense of rot or decay. The Whigs warned citizens to be on guard against corruption and to be eternally vigilant against possible conspiracies to denude them of their hard-won liberties. Together, republican and Whig ideas predisposed the
American colonists to be on hair-trigger alert against any threat to their rights.

The circumstances of colonial life had done much to bolster those attitudes. Dukes and princes, barons, and bishops were unknown in the colonies, while property ownership and political participation were relatively accessible. The Americans had also grown accustomed to running their own affairs, largely unmo- lested by remote officials in London. Distance weakens authority; great distance weakens authority greatly. So it came as an especially jolting shock when Britain after 1763 tried to enclose its American colonists more snugly in its grip.

**Mercantilism and Colonial Grievances**

Britain’s empire was acquired in a “fit of absentminded- ness,” an old saying goes, and there is much truth in the jest. Not one of the original thirteen colonies except Georgia was formally planted by the British government. All the others were haphazardly founded by trading companies, religious groups, or land speculators.

The British authorities nevertheless embraced a theory, called mercantilism, that justified their control over the colonies. Mercantilists believed that wealth was power and that a country’s economic wealth (and hence its military and political power) could be measured by the amount of gold or silver in its treasury. To amass gold or silver, a country needed to export more than it imported. Possessing colonies thus conferred distinct advantages, since the colonies could both supply raw materials to the mother country (thereby reducing the need for foreign imports) and provide a guaranteed market for exports.

The London government looked on the American colonists more or less as tenants. They were expected to furnish products needed in the mother country, such as tobacco, sugar, and ships’ masts; to refrain from making for export certain products, such as woolen cloth or beaver hats; to buy imported manufactured goods exclusively from Britain; and not to indulge in bothersome dreams of economic self-sufficiency or, worse, self-government.

From time to time, Parliament passed laws to regulate the mercantilist system. The first of these, the Navigation Law of 1650, was aimed at rival Dutch shippers trying to elbow their way into the American carrying trade. Thereafter all commerce flowing to and from the colonies could be transported only in British (including colonial) vessels. Subsequent laws required that European goods destined for America first had to be landed in Britain, where tariff duties could be collected and British middlemen could take a slice of the profits. Other laws stipulated that American merchants must ship certain “enumerated” products, notably tobacco, exclusively to Britain, even though prices might be better elsewhere.

British policy also inflicted a currency shortage on the colonies. Since the colonists regularly bought more from Britain than they sold there, the difference had to be made up in hard cash. Every year gold and silver coins, mostly earned in illicit trade with the Spanish and French West Indies, drained out of the colonies, creating an acute money shortage. To facilitate everyday purchases, the colonists resorted to butter, nails, pitch, and feathers for purposes of exchange.

Currency issues came to a boil when dire financial need forced many of the colonies to issue paper money, which swiftly depreciated. British merchants and creditors squawked so loudly that Parliament prohibited the colonial legislatures from printing paper currency and from passing indulgent bankruptcy laws—practices that might harm British merchants. The Americans grumbled that their welfare was being sacrificed for the well-being of British commercial interests.

The British crown also reserved the right to nullify any legislation passed by the colonial assemblies if such
The Stamp Act

• 115

paid liberal bounties to colonial producers of ship parts, over the protests of British competitors. Virginia tobacco planters enjoyed a monopoly in the British market, snuffing out the tiny British tobacco industry. The colonists also benefited from the protection of the world’s mightiest navy and a strong, seasoned army of redcoats—all without a penny of cost.

But even when painted in its rosiest colors, the mercantile system burdened the colonists with annoying liabilities. Mercantilism stifled economic initiative and imposed a rankling dependency on British agents and creditors. Most grievously, many Americans simply found the mercantilist system debasing. They felt used, kept in a state of perpetual economic adolescence, and never allowed to come of age. As Benjamin Franklin wrote in 1775,

“We have an old mother that peevish is grown;  
She snubs us like children that scarce walk alone;  
She forgets we’re grown up and have sense of our own.”

Revolution broke out, as Theodore Roosevelt later remarked, because Britain failed to recognize an emerging nation when it saw one.

The Stamp Tax Uproar

Victory-flushed Britain emerged from the Seven Years’ War holding one of the biggest empires in the world—and also, less happily, the biggest debt, some £140 million, about half of which had been incurred defending the American colonies. To justify and service that debt, British officials now moved to redefine their relationship with their North American colonies.

Prime Minister George Grenville first aroused the resentment of the colonists in 1763 by ordering the British navy to begin strictly enforcing the Navigation Laws. He also secured from Parliament the so-called Sugar Act of 1764, the first law ever passed by that body for raising tax revenue in the colonies for the crown. Among various provisions, it increased the duty on foreign sugar imported from the West Indies. After
bitter protests from the colonists, the duties were lowered substantially, and the agitation died down. But resentment was kept burning by the [Quartering Act] of 1765. This measure required certain colonies to provide food and quarters for British troops.

Then in the same year, 1765, Grenville imposed the most odious measure of all: a [stamp tax], to raise revenues to support the new military force. The Stamp Act mandated the use of stamped paper or the affixing of stamps, certifying payment of tax. Stamps were required on bills of sale for about fifty trade items as well as on certain types of commercial and legal documents, including playing cards, pamphlets, newspapers, diplomas, bills of lading, and marriage licenses.

Grenville regarded all of these measures as reasonable and just. He was simply asking the Americans to pay a fair share of the costs for their own defense, through taxes that were already familiar in Britain. In fact, the British people for two generations had endured a stamp tax far heavier than that passed for the colonies.

Yet the Americans were angrily aroused at what they regarded as Grenville’s fiscal aggression. The new laws did not merely pinch their pocketbooks. Far more ominously, Grenville also seemed to be striking at the local liberties they had come to assume as a matter of right. Thus some colonial assemblies defiantly refused to comply with the Quartering Act, or voted only a fraction of the supplies that it called for.

Worst of all, Grenville’s noxious legislation seemed to jeopardize the basic rights of the colonists as Englishmen. Both the Sugar Act and the Stamp Act provided for trying offenders in the hated [admiralty courts], where juries were not allowed. The burden of proof was on the defendants, who were assumed to be guilty unless they could prove themselves innocent. Trial by jury and the precept of “innocent until proved guilty” were ancient privileges that British people everywhere, including the American colonists, held most dear.

And why was a British army needed at all in the colonies, now that the French were expelled from the continent and Pontiac’s warriors crushed? Could its real purpose be to whip rebellious colonists into line? Many Americans, weaned on radical Whig suspicion of all authority, began to sniff the strong scent of a conspiracy to strip them of their historic liberties. They lashed back violently, and the Stamp Act became the target that drew their most ferocious fire.

Angry throats raised the cry “No taxation without representation.” There was some irony in the slogan, because the seaports and tidewater towns that were most wrathful against the Stamp Act had long denied full representation to their own backcountry pioneers. But now the aggravated colonists took the high ground of principle.

The Americans made a distinction between “legislation” and “taxation.” They conceded the right of Parliament to legislate about matters that affected the entire empire, including the regulation of trade. But they steadfastly denied the right of Parliament, in which no Americans were seated, to impose taxes on Americans. Only their own elected colonial legislatures, the Americans insisted, could legally tax them. Taxes levied by the distant British Parliament amounted to robbery, a piratical assault on the sacred rights of property.

Grenville dismissed these American protests as hairsplitting absurdities. The power of Parliament was supreme and undivided, he asserted, and in any case the Americans were represented in Parliament. Elaborating the theory of “virtual representation,” Grenville claimed that every member of Parliament represented all British subjects, even those Americans in Boston or Charleston who had never voted for a member of Parliament.

The Americans scoffed at the notion of virtual representation. And truthfully, they did not really want direct representation in Parliament, which might have seemed like a sensible compromise. If they had obtained it, any gouty member of the House of Commons could have proposed an oppressive tax bill for the colonies, and the outvoted American representatives, few in number, would have stood bereft of a principle with which to resist.

Thus the principle of no taxation without representation was supremely important, and the colonists clung to it with tenacious consistency. When the British replied that the sovereign power of government

---

The Boston Gazette declared in 1765,

“...A colonist cannot make a button, a horseshoe, nor a hobnail, but some snooty ironmonger or respectable buttonmaker of Britain shall bawl and squall that his honor’s worship is most egregiously maltreated, injured, cheated, and robbed by the rascally American republicans.”

---

English statesman Edmund Burke (1729–1797) warned in 1775,

“...Young man, there is America—which at this day serves for little more than to amuse you with stories of savage men and uncouth manners; yet shall, before you taste of death, show itself equal to the whole of that commerce which now attracts the envy of the world.”
could not be divided between “legislative” authority in London and “taxing” authority in the colonies, they forced the Americans to deny the authority of Parliament altogether and to begin to consider their own political independence. This chain of logic eventually led, link by link, to revolutionary consequences.

**Forced Repeal of the Stamp Act**

Colonial outcries against the hated stamp tax took various forms. The most conspicuous assemblage was the **Stamp Act Congress** of 1765, which brought together in New York City twenty-seven distinguished delegates from nine colonies. After dignified debate the members drew up a statement of their rights and grievances and beseeched the king and Parliament to repeal the repugnant legislation.

The Stamp Act Congress, which was largely ignored in England, made little splash at the time in America. Its ripples, however, began to erode sectional suspicions, for it brought together around the same table leaders from the different and rival colonies. It was one more halting but significant step toward intercolonial unity.

More effective than the congress was the widespread adoption of **nonimportation agreements** against British goods. Woolen garments of homespun became fashionable, and the eating of lamb chops was discouraged so that the wool-bearing sheep would be allowed to mature. Nonimportation agreements were in fact a promising stride toward union; they spontaneously united the American people for the first time in common action.

Mobilizing in support of nonimportation gave ordinary American men and women new opportunities to participate in colonial protests. Many people who had previously stood on the sidelines now signed petitions swearing to uphold the terms of the consumer boycotts. Groups of women assembled in public to hold spinning bees and make homespun cloth as a replacement for shunned British textiles. Such public defiance helped spread angry resistance throughout American colonial society.

Sometimes violence accompanied colonial protests. Groups of ardent spirits, known as **Sons of Liberty** and **Daughters of Liberty**, took the law into their own hands. Crying “Liberty, Property, and No Stamps,” they enforced the nonimportation agreements against violators, often with a generous coat of tar and feathers. Patriotic mobs ransacked the houses of unpopular officials, confiscated their money, and hanged effigies of stamp agents on liberty poles.

Shaken by colonial commotion, the machinery for collecting the tax broke down. On that dismal day in

John Dickinson (1732–1808), a lawyer and popular essayist, advocated a middle-of-the-road response to the new British revenue acts of the 1760s that appealed to most colonists at the time:

“...The constitutional modes of obtaining relief are those which I wish to see pursued on the present occasion... We have an excellent prince, in whose good disposition we may confide... Let us behave like dutiful children who have received unmerited blows from a beloved parent. Let us complain to our parent; but let our complaint speak at the same time the language of affliction and veneration.”
1765 when the new act was to go into effect, the stamp agents had all been forced to resign, and there was no one to sell the stamps. While flags flapped at half-mast, the law was openly and flagrantly defied—or, rather, nullified.

England was hard hit. America then bought about one-quarter of all British exports, and about one-half of British shipping was devoted to the American trade. Merchants, manufacturers, and shippers suffered from the colonial nonimportation agreements, and hundreds of laborers were thrown out of work. Loud demands converged on Parliament for repeal of the Stamp Act. But many of the members could not understand why 7.5 million Britons had to pay heavy taxes to protect the colonies, whereas some 2 million colonists refused to pay for only one-third of the cost of their own defense.

After a stormy debate, Parliament in 1766 grudgingly repealed the Stamp Act. Grateful residents of New York erected a leaden statue to King George III. But American rejoicing was premature. Having withdrawn the Stamp Act, Parliament in virtually the same breath provocatively passed the Declaratory Act, reaffirming Parliament’s right “to bind” the colonies “in all cases whatsoever.” The British government thereby drew its line in the sand. It defined the constitutional principle it would not yield: absolute and unqualified sovereignty over its North American colonies. The colonists had already drawn their own battle line by making it clear that they wanted a measure of sovereignty of their own and would undertake drastic action to secure it. The stage was set for a continuing confrontation. Within a few years, that statue of King George would be melted into thousands of bullets to be fired at his troops.

The Townshend Tea Tax and the Boston “Massacre”

Control of the British ministry was now seized by the gifted but erratic Charles (“Champagne Charley”) Townshend, a man who could deliver brilliant speeches in Parliament even while drunk. Rashly promising to pluck feathers from the colonial goose with a minimum of squawking, he persuaded Parliament in 1767 to pass the Townshend Acts. The most important of these new regulations was a light import duty on glass, white lead, paper, paint, and tea. Townshend, seizing on a dubious distinction between internal and external taxes, made this tax, unlike the stamp tax, an indirect customs duty payable at American ports. But to the increasingly restless colonists, this was a phantom distinction. For them the real difficulty remained taxes—in any form—without representation.

Flushed with their recent victory over the stamp tax, the colonists were in a rebellious mood. The impost on tea was especially irksome, for an estimated 1 million people drank the refreshing brew twice a day.

The new Townshend revenues, worse yet, were to be earmarked to pay the salaries of the royal governors and judges in America. From the standpoint of efficient administration by London, this was a reform long overdue. But the ultrasuspicious Americans, who had beaten the royal governors into line by controlling the purse, regarded Townshend’s tax as another attempt to enchain them. Their worst fears took on greater reality when the London government, after passing the Townshend taxes, suspended the legislature of New York in 1767 for failure to comply with the Quartering Act.

Nonimportation agreements, previously potent, were quickly revived against the Townshend Acts. But they proved less effective than those devised against the Stamp Act. The colonists, again enjoying prosperity, took the new tax less seriously than might have been expected, largely because it was light and indirect.
The Boston Massacre

eleven-year-old boy, shot ten days earlier during a protest against a merchant who had defied the colonial boycott of British goods. Acting apparently without orders, but nervous and provoked by the jeering crowd, the troops opened fire and killed or wounded eleven citizens, an event that became known as the Boston Massacre. One of the first to die was Crispus Attucks, described by contemporaries as a powerfully built runaway “mulatto” and a leader of the mob. Both sides were in some degree to blame, and in the subsequent trial (in which future president John Adams served as defense attorney for the soldiers), only two of the redcoats were found guilty of manslaughter. The soldiers were released after being branded on the hand.

The Seditious Committees of Correspondence

By 1770 King George III, then only thirty-two years old, was strenuously attempting to assert the power of the British monarchy. He was a good man in his private morals, but he proved to be a bad ruler. Earnest, industrious, stubborn, and lustful for power, he surrounded himself with cooperative “yes men,” notably his corpulent prime minister, Lord North.
The ill-timed Townshend Acts had failed to produce revenue, though they did produce near-rebellion. Net proceeds from the tax in one year were a paltry £295, while in that same year Britain’s military costs in the colonies had mounted to £170,000. Nonimportation agreements, though feebly enforced, were pinching British manufacturers. The government of Lord North, bowing to various pressures, finally persuaded Parliament to repeal the Townshend revenue duties. But the three-pence toll on tea, the tax the colonists found most offensive, was retained to keep alive the principle of Parliament’s right to tax the colonies.

Flames of discontent in America continued to be fanned by numerous incidents, including the redoubled efforts of the British officials to enforce the Navigation Laws. Resistance was further kindled by a master propagandist and engineer of rebellion, Samuel Adams of Boston, a cousin of John Adams. Unimpressive in appearance (his hands trembled), he lived and breathed only for politics. His friends had to buy him a presentable suit of clothes when he left Massachusetts on intercolonial business. Zealous, tenacious, and courageous, he was ultrasensitive to infractions of colonial rights. Cherishing a deep faith in the common people, he appealed effectively to what was called his “trained mob.”

Samuel Adams’s signal contribution was to organize in Massachusetts the local committees of correspondence. After he had formed the first one in Boston during 1772, some eighty towns in the colony speedily set up similar organizations. Their chief function was to spread the spirit of resistance by exchanging letters and thus keep alive opposition to British policy. One critic referred to the committees as “the foulest, subtlest, and most venomous serpent ever issued from the egg of sedition.”

Intercolonial committees of correspondence were the next logical step. Virginia led the way in 1773 by creating such a body as a standing committee of the House of Burgesses. Within a short time, every colony had established a central committee through which it could exchange ideas and information with other
colonies. These intercolonial groups were supremely significant in stimulating and disseminating sentiment in favor of united action. They evolved directly into the first American congresses.

Tea Brewing in Boston

Thus far—that is, by 1773—nothing had happened to make rebellion inevitable. Nonimportation was weakening. Increasing numbers of colonists were reluctantly paying the tea tax, because the legal tea was now cheaper than the smuggled tea, even cheaper than tea in England.

A new ogre entered the picture in 1773. The powerful British East India Company, overburdened with 17 million pounds of unsold tea, was facing bankruptcy. If it collapsed, the London government would lose heavily in tax revenue. The ministry therefore decided to assist the company by awarding it a complete monopoly of the American tea business. The giant corporation would now be able to sell the coveted leaves more cheaply than ever before, even with the three-pence tax tacked on. But many American tea drinkers, rather than rejoicing at the lower prices, cried foul. They saw this British move as a shabby attempt to trick the Americans, with the bait of cheaper tea, into swallowing the principle of the detested tax. For the determined Americans, principle remained far more important than price.

If the British officials insisted on the letter of the law, violence would certainly result. Fatefully, the British colonial authorities decided to enforce the law. Once more, the colonists rose up in wrath to defy it. Not a single one of the several thousand chests of tea shipped by the East India Company ever reached the hands of the consignees. In Philadelphia and New York, mass demonstrations forced the tea-bearing ships to return to England with their cargo holds still full. At Annapolis, Marylanid burned both cargo and vessel, while proclaiming “liberty and Independence or death in pursuit of it.” In Charleston, South Carolina, officials seized the tea for nonpayment of duties after intimidated local merchants refused to accept delivery. (Ironically, the confiscated Charleston tea was later auctioned to raise money for the Revolutionary army.)

Only in Boston did a British official stubbornly refuse to be cowed. Massachusetts governor Thomas Hutchinson had already felt the fury of the mob, when Stamp Act protesters had destroyed his home in 1765. This time he was determined not to budge. Ironically, Hutchinson agreed that the tea tax was unjust, but he believed even more strongly that the colonists had no right to flout the law. Hutchinson infuriated Boston’s radicals when he ordered the tea ships not to clear Boston harbor until they had unloaded their cargoes. Sentiment against him was further inflamed when Hutchinson’s enemies published one of his private letters in which he declared that “an abridgement of what are called English liberties” was necessary for the preservation of law and order in the colonies—apparently confirming the darkest conspiracy theories of the American radicals.

On December 16, 1773, roughly a hundred Bostonians, loosely disguised as Indians, boarded the docked ships, smashed open 342 chests of tea, and dumped their contents into the Atlantic, an action that came to be known as the Boston Tea Party. A crowd of several hundred watched approvingly from the shore as Boston harbor became a vast teapot. Donning Indian disguise provided protesters with a threatening image—and a convenient way of avoiding detection.

The Boston Tea Party, December 16, 1773

"Crying "Boston harbor a teapot this night," Sons of Liberty disguised as Indians hurled chests of tea into the sea to protest the tax on tea and to make sure that its cheap price did not prove an "invincible temptation" to the people."
Tea was the perfect symbol to rally around as almost every colonist, rich or poor, consumed this imported, cafffeinated beverage.

Reactions varied. All up and down the eastern seaboard, sympathetic colonists applauded. Referring to tea as “a badge of slavery,” they burned the hated leaves in solidarity with Boston. But conservatives complained that the destruction of private property violated the law and threatened anarchy and the breakdown of civil decorum. Hutchinson, chastened and disgusted with the colonies, retreated to Britain, never to return. The British authorities, meanwhile, saw little alternative to the colonies, retreated to Britain, never to return. The British authorities, meanwhile, saw little alternative to

\[ \text{the massacre of American Liberty.} \]

Most drastic of all was the Boston Port Act. It closed the tea-stained harbor until damages were paid and order could be ensured. By other “Intolerable Acts”—as they were called in America—many of the chartered rights of colonial Massachusetts were swept away. Restrictions were likewise placed on the precious town meetings. Contrary to previous practice, enforcing officials who killed colonists in the line of duty could now be sent to Britain for trial. There, suspicious Americans assumed, they would be likely to get off scot-free. Particularly intolerable to Bostonians was a new Quartering Act, which gave local authorities the power to lodge British soldiers anywhere, even in private homes.

By a fateful coincidence, the “Intolerable Acts” were accompanied in 1774 by the Quebec Act. Passed at the same time, it was erroneously regarded in English-speaking America as part of the British reaction to the turbulence in Boston. Actually, the Quebec Act was a good law in bad company. For many years the British government had debated how it should administer the sixty thousand or so conquered French subjects in Canada, and it had finally framed this farsighted and statesmanlike measure. The French were guaranteed their Catholic religion. They were also permitted to retain many of their old customs and institutions, which did not include a representative assembly or trial by jury in civil cases. In addition, the old boundaries of the province of Quebec were now extended southward all the way to the Ohio River.

The Quebec Act, from the viewpoint of the French Canadians, was a shrewd and conciliatory measure. If Britain had only shown as much foresight in dealing with its English-speaking colonies, it might not have lost them.

But from the viewpoint of the American colonists as a whole, the Quebec Act was especially noxious. All the other “Intolerable Acts” slapped directly at Massachusetts, but this one had a much wider range. By sustaining unrepresentative assemblies and denials of jury trials, it seemed to set a dangerous precedent in America. It alarmed land speculators, who were distressed to see the huge trans-Allegheny area snatched from their grasp (see Map 7.1). It aroused anti-Catholics, who were shocked by the extension of Roman Catholic jurisdiction southward into a huge region that had once been earmarked for Protestantism—a region about as large as the thirteen original colonies. One angry Protestant cried that there ought to be a “jubilee in hell” over this enormous gain for “Popery.”

\[ \text{Bloodshed} \]

American dissenters responded sympathetically to the plight of Massachusetts. It had put itself in the wrong by the violent destruction of the tea cargoes; now Britain had put itself in the wrong by brutal punishment that seemed far too cruel for the crime. Flags were flown at half-mast throughout the colonies on the day that the Boston Port Act went into effect, and sister colonies rallied to send food to the stricken city. Rice was shipped even from faraway South Carolina.

Most memorable of the responses to the “Intolerable Acts” was the summoning of the First Continental
The Eve of Rebellion

nowledged papers. These included a ringing Declaration of Rights, as well as solemn appeals to other British American colonies, to the king, and to the British people.

The most significant action of the Congress was the creation of The Association. Unlike previous nonimportation agreements, The Association called for a complete boycott of British goods: nonimportation, nonexportation, and nonconsumption. Yet it is important to note that the delegates were not yet calling for independence. They sought merely to repeal the offensive legislation and return to the happy days before parliamentary taxation. If colonial grievances were redressed, well and good; if not, the Congress was to meet again in May 1775. Resistance had not yet ripened into open rebellion.

But the fatal drift toward war continued. Parliament rejected the Congress’s petitions. In America
chickens squawked and tar kettles bubbled as violators of The Association were tarred and feathered. Muskets were gathered, men began to drill openly, and a clash seemed imminent.

In April 1775 the British commander in Boston sent a detachment of troops to nearby Lexington and Concord. They were to seize stores of colonial gunpowder and also to bag the “rebel” ringleaders, Samuel Adams and John Hancock. At Lexington the colonial “Minute Men” refused to disperse rapidly enough, and shots were fired that killed eight Americans and wounded several more. The affair was more the “Lexington Massacre” than a battle. The redcoats pushed on to Concord, whence they were forced to retreat by the rough and ready Americans, whom Emerson immortalized:

*By the rude bridge that arched the flood,  
Their flag to April’s breeze unfurled,  
Here once the embattled farmers stood,  
And fired the shot heard round the world.*

The bewildered British, fighting off murderous fire from militiamen crouched behind thick stone walls, finally regained the sanctuary of Boston. Licking their wounds, they could count about three hundred casualties, including some seventy killed. Britain now had a war on its hands.

Aroused Americans had brashly rebelled against a mighty empire (see “Thinking Globally: Imperial Rivalry and Colonial Revolt,” pp. 126–127). The population odds were about three to one against the

*The great conservative political theorist and champion of the American cause Edmund Burke made a stirring speech in Britain’s House of Commons in 1775, pleading in vain for reconciliation with the colonies:*

“As long as you have the wisdom to keep the sovereign authority of this country as the sanctuary of liberty . . . they will turn their faces towards you. . . . Slavery they can have anywhere; freedom they can have from none but you. This is the commodity of price, of which you have the monopoly. This is the true Act of Navigation, which binds to you the commerce of the colonies, and through them secures to you the wealth of the world. Deny them this participation of freedom, and you break that sole bond which originally made, and must still preserve, the unity of the empire.”
rebels—some 7.5 million Britons to 2.5 million colonists. The odds in monetary wealth and naval power overwhelmingly favored the mother country.

Britain then boasted a professional army of some fifty thousand men, as compared with the numerous but wretchedly trained American militia. George III, in addition, had the treasury to hire foreign soldiers, and some thirty thousand Germans—so-called Hessians—were ultimately employed. The British enrolled about fifty thousand American Loyalists and enlisted the services of many Indians, who though unreliable fair-weather fighters, inflamed long stretches of the frontier. One British officer boasted that the war would offer no problems that could not be solved by an “experienced sheep herder.”

Yet Britain was weaker than it seemed at first glance. Oppressed Ireland was a smoking volcano, and British troops had to be detached to watch it. France, bitter from its recent defeat, was awaiting an opportunity to stab Britain in the back. The London government was confused and inept. There was no William Pitt, “Organizer of Victory,” only the stubborn George III and his pliant Tory prime minister, Lord North.

Many earnest and God-fearing Britons had no desire whatever to kill their American cousins. William Pitt withdrew a son from the army rather than see him thrust his sword into fellow Anglo-Saxons struggling for liberty. The English Whig factions, opposed to Lord North’s Tory wing, openly cheered American victories—at least at the outset. Aside from trying to embarrass the Tories politically, many Whigs believed that the battle for British freedom was being fought in America. If George III triumphed, his rule at home might become tyrannical. This outspoken sympathy in Britain, though plainly a minority voice, greatly encouraged the Americans. If they continued their resistance long enough, the Whigs might come into power and deal generously with them.

Britain’s army in America had to operate under endless difficulties. The generals were second-rate; the soldiers, though on the whole capable, were brutally treated. There was one extreme case of eight hundred lashes on the bare back for striking an officer. Provisions were often scarce, rancid, and wormy. On one occasion a supply of biscuits, captured some fifteen years earlier from the French, was softened by dropping cannonballs on them.

Other handicaps loomed. The redcoats had to conquer the Americans; restoring the pre-1763 status quo would be a victory for the colonists. Britain was operating some 3,000 miles from its home base, and distance added greatly to the delays and uncertainties arising from storms and other mishaps. Military orders were issued in London that, when received months later, would not fit the changing situation.

America’s geographical expanse was enormous: roughly 1,000 by 600 miles. The united colonies had no urban nerve center, like France’s Paris, whose capture would cripple the country as a whole. British armies took every city of any size, yet like a boxer punching a feather pillow, they made little more than a dent in the entire country. The Americans wisely traded space for time. Benjamin Franklin calculated that during the prolonged campaign in which the redcoats captured Bunker Hill and killed some 150 Patriots, about 60,000 American babies were born.

**American Pluses and Minuses**

The revolutionaries were blessed with outstanding leadership. George Washington was a giant among men; Benjamin Franklin was a master among diplomats. Open foreign aid, theoretically possible from the start, eventually came from France. Numerous European officers, many of them unemployed and impoverished, volunteered their swords for pay. In a class by himself was a wealthy young French nobleman, the Marquis de Lafayette. Fleeing from boredom, loving glory and ultimately liberty, the “French gamecock” was made a major general in the colonial army at age nineteen. His commission was largely a recognition of his family influence and political connections, but the services of this teenage general in securing further aid from France were invaluable.

Other conditions aided the Americans. They were fighting defensively, with the odds, all things considered, favoring the defender. In agriculture, the colonies were mainly self-sustaining, like a kind of Robinson Crusoe’s island. The Americans also enjoyed the moral advantage that came from belief in a just cause. The historical odds were not impossible. Other peoples had triumphed in the face of greater obstacles: Greeks against Persians, Swiss against Austrians, Dutch against Spaniards.

Yet the American rebels were badly organized for war. From the earliest days, they had been almost fatally lacking in unity, and the new nation lurched forward uncertainly like an uncoordinated centipede.

---

**General Washington’s (1732–1799) disgust with his countrymen is reflected in a diary entry for 1776:**

“Chimney corner patriots abound; venality, corruption, prostitution of office for selfish ends, abuse of trust, perversion of funds from a national to a private use, and speculations upon the necessities of the times pervade all interests.”

In 1765 tax revolts exploded almost simultaneously in both Britain’s and Spain’s New World empires. In Boston the hated Stamp Act sparked riots and inspired a campaign to boycott British goods. At virtually the same moment in Quito (in present-day Ecuador), a two-mile-high Spanish colonial city nearly twice the size of Boston, surging crowds ransacked the local tax collector’s office. Among other demands, they insisted that “pure” Spaniards leave Quito unless they had married into the native Creole (New World–born white) or indigenous Indian communities. Spanish officials restored order by force of arms, but antitax agitation continued to smolder everywhere in Spanish America. “There is no American,” a Quito lawyer remarked, “who does not reject any novelty whatsoever in the management of taxation”—a sentiment that resonated as strongly in Philadelphia as in Mexico City.

Things soon got worse. Madrid’s New World imperial authority was shaken to the core in 1781 when another tax revolt erupted in New Granada (present-day Colombia). By that time, the British colonials’ War of Independence in North America was in its fifth year.

Intensifying imperial rivalry fueled events on both the American continents. Until the mid–seventeenth century, the three great Old World powers—England, France, and Spain—had largely confined their competition to struggles over boundaries and religious affiliation on the European continent. But after the Treaty of Westphalia in 1648 brought a truce to the wars of religion that had racked Europe for decades (the Thirty Years’ War), great-power competition began to shift overseas. The faraway New World imperial outposts of Britain, Spain, and France now became pawns in a global struggle for mastery in Europe.

The Seven Years’ War (1756–1763) ushered in a still more ferocious cycle of imperial conflict. Britain succeeded in expelling France from North America, but victory brought the burdens of managing vast new territories as well as the prospect of fresh confrontations with Native Americans threatened by westward expansion. Spain, France’s erstwhile ally, grew increasingly wary of the newly invigorated and ambitious British Empire, which threatened Spanish interests at sea and along the sketchy borderlands that separated the two powers’ imperial domains. As the risks and costs of imperial competition soared, London and Madrid adopted the same strategy: pressure the colonies to pay their share. New taxes and customs duties followed, along with more energetic efforts to collect them. To imperial officials like Britain’s Prime Minister George Grenville or Madrid’s “visitor general” to New Spain, José Gálvez, such reforms seemed not only

Tupac Amaru II  A Peruvian national hero, Tupac Amaru II is memorialized to this day with his portrait on the nation’s currency.
reasonable but in tune with Enlightenment ideas about efficient administration. To colonial subjects these new policies were an anathema, a flagrant offense to their fundamental rights as colonial subjects.

But why did revolts against these new imperial policies kindle a full-fledged war for independence in the British colonies but not in Spanish America—at least not until Napoleon’s invasion of Spain in 1808 hurled the Spanish Empire into tumult?

The role of rich and powerful allies provides part of the answer. The North American rebels could count on Britain’s French and Spanish enemies to tender financial as well as military support. Spanish American anticolonial rebels had no such allies in London or Paris, which saw little prospect of unraveling the Spanish Empire and were already fully engaged on opposite sides of the American War of Independence.

The demographic composition of the two empires furnishes another part of the answer. Spanish America was badly riven by sharp ethnic and racial divisions. The Spanish court had long encouraged the relatively few Spaniards who settled in the New World to intermarry with the local inhabitants. By the eighteenth century, the Spanish colonies had become a complex, tension-ridden mosaic of European, Creole, mestizo, and Indian peoples and cultures. When in 1780 the self-proclaimed Incan royal descendant Tupac Amaru II rebelled against Spanish rule, he at first attracted Creoles, but they bolted as the movement radicalized, and his rebellion was soon cruelly crushed.

To be sure, the British North American colonists had their ethnic differences, too, but many fewer. They had nurtured a culture of exclusion, rejecting intermarriage with Indians and blacks and banishing Indians to the wilderness. And they faced no Indian threat on the scale of Tupac Amaru II’s uprising.

Inherited political traditions also played different roles. British settlers enjoyed long-standing institutions of political representation. They had brought with them from the mother country devotion to individual rights and the privilege of legal assembly that, when revolution came, gave their cause the kind of legitimacy that comes from time-honored habits. It was precisely the violation of those rights and privileges that “taxation without representation” seemed to threaten. Spanish colonists had representative institutions, too, but in Spain’s much more autocratic imperial scheme, local assemblies lacked the authority, autonomy, and legitimacy they had come to enjoy in the British domains. North American colonists asserted their right to self-government on the basis of their historic rights as British subjects, a claim that was much more difficult to make in the absolutist monarchy of the Spanish Empire.

Couple with Child by Miguel Cabera  This eighteenth-century portrait of a Mexican family illustrates the common intermarriage of Europeans and Indians in the Spanish New World. The ethnic complexity of Spanish America kept colonists there from uniting against imperial authorities as successfully as their northern neighbors.
the near-worthless dollars. The confusion proliferated when the individual states were compelled to issue depreciated paper money of their own.

Inflation of the currency inevitably skyrocketed prices. Families of the soldiers at the fighting front were hard hit, and hundreds of anxious husbands and fathers deserted. Debtors easily acquired handfuls of the quasi-worthless money and gleefully paid their debts “without mercy”—sometimes with the bayonets of the authorities to back them up.

**A Thin Line of Heroes**

Basic military supplies in the colonies were dangerously scanty. While many families and towns did own firearms—widespread militia service meant men needed weapons for training—the colonists had long relied heavily on Britain for troops, armaments, and military subsidies during expensive wars against Indians, France, and Spain. The rebels were caught in an unavoidable trap: at the very moment that the supply of British funds and war materiel evaporated, the cost of home defense mounted. Sufficient stores of gunpowder, cannon, and other armaments (let alone ships to transport them) could not be found. Among the reasons for the eventual alliance with France was the need for a reliable source of essential military supplies.

Other shortages bedeviled the rebels. At Valley Forge, Pennsylvania, shivering American soldiers went without bread for three successive days in the cruel winter of 1777–1778. In one southern campaign, some men fainted for lack of food. Manufactured goods also were generally in short supply in agricultural America, and clothing and shoes were appallingly scarce. The path of the Patriot fighting men was often marked by bloody snow. At frigid Valley Forge, during one anxious period, twenty-eight hundred men were barefooted or nearly naked. Woolens were desperately needed against the wintry blasts, and in general the only real uniform of the colonial army was uniform raggedness. During a grand parade at Valley Forge, some of the officers appeared wrapped in woolen bedcovers. One Rhode Island unit was known as the “Ragged, Lousy, Naked Regiment.”

American militiamen were numerous but also highly unreliable. Able-bodied American males—perhaps several hundred thousand of them—had received rudimentary training. But poorly trained plowboys could not stand up in the open field against professional British troops advancing with bare bayonets. Many of these undisciplined warriors would, in the words of Washington, “fly from their own shadows.” At the same time, deadly smallpox outbreaks ravaged the army, further weakening forces.
The Rebel Army

Blacks also fought and died for the American cause. Although many states initially barred them from militia service, by war’s end more than five thousand blacks had enlisted in the American armed forces. The largest contingents came from the northern states with substantial numbers of free blacks.

Blacks fought at Trenton, Brandywine, Saratoga, and other important battles. Some, including Prince Whipple—later immortalized in Emanuel Leutze’s famous painting “Washington Crossing the Delaware” (see p. 143)—became military heroes. Others served as cooks, guides, spies, drivers, and road builders.

African Americans also served on the British side. In November 1775 Lord Dunmore, royal governor of Virginia, issued a proclamation promising freedom for any enslaved black in Virginia who joined the British army. News of Dunmore’s decree traveled swiftly. Virginia and Maryland tightened slave patrols, but within one month, three hundred slaves had joined what came to be called “Lord Dunmore’s Ethiopian Regiment.” In time thousands of blacks fled plantations for British promises of emancipation. When one of James Madison’s slaves was caught trying to escape to the British lines, Madison refused to punish him for “coveting that liberty” that white Americans proclaimed the “right & worthy pursuit of every human being.” At war’s end the British kept their word, to some at least, and evacuated as many as fourteen thousand “Black Loyalists” to Nova Scotia, Jamaica, and England.

Morale in the Revolutionary army was badly undermined by American profiteers. Putting profits before patriotism, they sold to the British because the invader could pay in gold. Speculators forced prices sky-high, and some Bostonians made profits of 50 to 200 percent.

Women played a significant part in the Revolution. Many maintained farms and businesses while their fathers and husbands fought. Large numbers of female camp followers accompanied the American army, cooking and sewing for the troops in return for money and rations. One Massachusetts woman dressed in men’s clothing and served in the army for seventeen months.

A few thousand regulars—perhaps seven or eight thousand at the war’s end—were finally whipped into shape by stern drillmasters. Notable among them was an organizational genius, the salty German Baron von Steuben. He spoke no English when he reached America, but he soon taught his men that bayonets were not for broiling beefsteaks over open fires. As they gained experience, these soldiers of the Continental line more than held their own against crack British troops.

Enslaved blacks hoped that the Revolutionary crisis would make it possible for them to secure their own liberty. On the eve of the war in South Carolina, merchant Josiah Smith, Jr., noted such a rumor among the slaves:

“[Freedom] is their common Talk throughout the Province, and has occasioned impertinent behavior in many of them, insonmuch that our Provincial Congress now sitting hath voted the immediate raising of Two Thousand Men Horse and food, to keep those mistaken creatures in awe.”

Despite such repressive measures, slave uprisings continued to plague the southern colonies through 1775 and 1776.

The Flutist, by Brazilla Lew

This portrait is believed to be that of an African American fifer in the Revolutionary War. Lew was a veteran of the Seven Years’ War who had marched to Ticonderoga and served in the army a full seven years as frontline soldier, fifer, and drummer. In 1775, at the age of thirty-two, he fought at Bunker Hill as an enlistee in the 27th Massachusetts Regiment. A resident of Chelmsford, Massachusetts, he was said to have taught all twelve of his children to play musical instruments.

Enslaved blacks hoped that the Revolutionary crisis would make it possible for them to secure their own liberty. On the eve of the war in South Carolina, merchant Josiah Smith, Jr., noted such a rumor among the slaves:

“[Freedom] is their common Talk throughout the Province, and has occasioned impertinent behavior in many of them, insonmuch that our Provincial Congress now sitting hath voted the immediate raising of Two Thousand Men Horse and food, to keep those mistaken creatures in awe.”

Despite such repressive measures, slave uprisings continued to plague the southern colonies through 1775 and 1776.

Blacks fought at Trenton, Brandywine, Saratoga, and other important battles. Some, including Prince Whipple—later immortalized in Emanuel Leutze’s famous painting “Washington Crossing the Delaware” (see p. 143)—became military heroes. Others served as cooks, guides, spies, drivers, and road builders.

African Americans also served on the British side. In November 1775 Lord Dunmore, royal governor of Virginia, issued a proclamation promising freedom for any enslaved black in Virginia who joined the British army. News of Dunmore’s decree traveled swiftly. Virginia and Maryland tightened slave patrols, but within one month, three hundred slaves had joined what came to be called “Lord Dunmore’s Ethiopian Regiment.” In time thousands of blacks fled plantations for British promises of emancipation. When one of James Madison’s slaves was caught trying to escape to the British lines, Madison refused to punish him for “coveting that liberty” that white Americans proclaimed the “right & worthy pursuit of every human being.” At war’s end the British kept their word, to some at least, and evacuated as many as fourteen thousand “Black Loyalists” to Nova Scotia, Jamaica, and England.

Morale in the Revolutionary army was badly undermined by American profiteers. Putting profits before patriotism, they sold to the British because the invader could pay in gold. Speculators forced prices sky-high, and some Bostonians made profits of 50 to 200 percent.
on army garb while the American army was freezing at Valley Forge. Washington never had as many as twenty thousand effective troops in one place at one time, despite bounties of land and other inducements. Yet if the rebels had thrown themselves into the struggle with zeal, they could easily have raised many times that number.

The brutal truth is that only a select minority of the American colonists attached themselves to the cause of independence with a spirit of selfless devotion. These were the dedicated souls who bore the burden of battle and the risks of defeat. Seldom have so few done so much for so many.

AP* Review Questions for Chapter 7

1. The republican and Whig ideologies that English colonists embraced by the mid-eighteenth century included all of the following tenets EXCEPT that
(A) power should be centralized within the monarchy.
(B) citizens should put the public good ahead of their self-interest.
(C) a functioning society is based on the virtue of its citizenry.
(D) self-sufficiency, courage, and civic involvement are crucial for republican societies.
(E) hierarchical governments breed corruption.

2. Which of the following circumstances did NOT influence America’s attitudes about rights and the nature of government by the 1750s?
(A) The aristocracy that was common in England never took hold in the colonies.
(B) Property ownership and political participation was more easily accessible in the colonies.
(C) Colonists had become accustomed to running things for themselves, with little interference from the crown.
(D) Colonies universally embraced religious toleration.
(E) The vast ocean expanse that distanced England from the colonies also weakened its ability to exert its authority.

3. Britain’s relationship with its colonies was based on mercantilism, the theory that
(A) wealth is power, and colonies could be used to enrich the mother country.
(B) colonies should develop independent trade so as not to financially burden the mother country.
(C) commerce should be allowed to develop, uninhibited by government interference.
(D) England had the right to tax and regulate the colonies as it saw fit.
(E) the colonies should become economically self-sufficient within twenty-five years of settlement.

4. The colonists detested the mercantilist system for all of these reasons EXCEPT that
(A) it kept them in a state of economic dependency.
(B) it caused a currency surplus.
(C) England nullified any laws passed by colonial governments that interfered with the mercantilist system.
(D) it restricted how American goods could be transported or sold.
(E) it required the colonies to buy certain goods only from Britain.

5. In what ways did mercantilism benefit the colonists?
(A) England provided subsidies for surplus crops.
(B) Mercantilism helped several colonial merchants become wealthy.
(C) It elevated some colonists to positions of political power.
(D) It stimulated American wool manufacturing.
(E) Britain granted them certain trade monopolies and protected them militarily.

6. To raise money to cover debts incurred in the Seven Years’ War and to reassert authority over its North American colonies, Britain passed and enforced all of the following measures EXCEPT the
(A) Navigation Acts.
(B) Sugar Act.
(C) Intolerable Act.
(D) Quartering Act.
(E) Stamp Act.

7. Americans responded to Britain’s many new taxes in the 1760s with the line, “No taxation without representation.” What did this mean exactly?
(A) That Americans wanted to have representatives in Parliament before they would accept tax legislation passed there
(B) That only colonial legislatures could tax the colonies
(C) That colonists would accept virtual representation in fiscal matters
(D) That Parliament put the needs of citizens in England above those of its colonists
(E) That the king was the ultimate representative, and therefore, exclusively held the power to tax

8. Which of these protests against the Stamp Act was most effective in ultimately securing its repeal?
(A) The Stamp Act Congress of 1765
(B) Petitions to Parliament
(C) Nonimportation agreements
(D) Violent protests
(E) Refusal to pay the tax

9. British colonists were outraged by the Townshend Act for all of the following reasons EXCEPT that
(A) it sought to skirt the issue of taxation by imposing “duties” instead.
(B) it taxed many of their favorite imported goods.
(C) monies collected under the act would pay the salaries of royal officials.
(D) it included a provision to close any colonial port that did not pay the duties.
(E) it was yet another example of taxation without representation.
10. The Boston Massacre, which occurred on March 5, 1770, describes
   (A) a protest in which colonists burned Governor Thomas Hutchinson’s house to the ground.
   (B) a standoff between colonists and redcoats that resulted in the deaths of eleven Bostonians.
   (C) a mob protest in which two dozen British soldiers were killed.
   (D) the first military battle between the Sons of Liberty and the British.
   (E) the dumping of 342 chests of imported tea and other goods into Boston harbor.

11. What was the most significant role of the Committees of Correspondence?
   (A) Writing broadsides
   (B) Encouraging women’s participation in boycotts and rebellions
   (C) Building momentum for a complete break with England
   (D) Seeking every colony’s participation in the first American Congress
   (E) Organizing local letter-writing campaigns to fortify colonial resistance to British policies

12. Why did tea become the focus of protests against British policies that ended with the Boston Tea Party in 1773?
   (A) The price of tea had skyrocketed under the British East India Company’s trade monopoly.
   (B) Colonists resented England’s attempt to force only one tea source on them.
   (C) Tea touched the lives of colonists from every social class.
   (D) It was England’s leading export.
   (E) Colonists could easily go without tea.

13. The First Continental Congress met in 1774 principally to
   (A) strategize ways to redress colonial grievances.
   (B) declare the colony’s independence from England.
   (C) outline a new national government for the future United States.
   (D) organize a colonial army.
   (E) enlist the support of other countries in their conflict with England.

14. Both Britain and Spain pressured their colonies with new taxes to help pay their share of the Seven Years’ War, but reaction to these policies led to a war for independence only among British colonists for all of the following reasons EXCEPT that
   (A) Britain had rich and powerful enemies that colonists could tap for assistance.
   (B) Spanish colonies were far more ethnically and racially divided.
   (C) British settlers were accustomed to more liberal local governments than those in Spain and its colonies.
   (D) rights were a central component of British notions of citizenship.
   (E) British colonists had established local militias from the earliest days of settlement.

15. Which of the following lists is chronologically accurate?
   (A) Stamp Act, Boston Tea Party, Intolerable Acts, Townshend Acts
   (B) Sugar Act, Boston Massacre, The Association, Intolerable Acts
   (C) Stamp Act, Boston Tea Party, Lexington and Concord, First Continental Congress
   (D) Sugar Act, Townshend Acts, Boston Tea Party, First Continental Congress
   (E) Declaratory Act, Quebec Act, Boston Massacre, Quartering Act

16. At the beginning of the Revolutionary War, British victory seemed certain because
   (A) the British were more familiar with the terrain on which the fighting occurred.
   (B) Britain boasted a professional army of fifty thousand men.
   (C) the British cause was morally justified.
   (D) the Whigs and Tories were united in their goals for the American colonies.
   (E) Britain had the support of other European nations.
